

RAMEESH K P

React Native Software Engineer

+91 7560961914 | irAMEESHKP@gmail.com | Kerala, India | [Portfolio](#)

PROFESSIONAL SUMMARY

React Native Software Engineer with 7+ years of experience building production mobile and web applications across fintech, Web3, healthcare, marketplace, e-commerce, and enterprise domains. Experienced in shipping offline-capable, API-integrated apps through full CI/CD and app store release cycles.

CORE SKILLS

Mobile: React Native, Expo, Ionic, iOS, Android, cross-platform mobile development

Frontend: JavaScript, TypeScript, Angular, HTML5, CSS3, component-based UI development

State and Data: Redux, Zustand, Jotai, React Query, Axios, REST API integration, GraphQL API integration

Storage and Offline: SQLite, Drizzle ORM, WatermelonDB, offline-first mobile features

Web3 and Blockchain: Solana, decentralized applications, crypto wallets, token transfers, on-chain portfolios

CI/CD and Release: GitHub Actions, EAS, app store deployment, App Store publishing, Play Store publishing

Tools: Android Studio, Xcode, VS Code, Git, Jira, Zoho

PROFESSIONAL EXPERIENCE

Senior Software Engineer — [Enceladus DLT](#)

06/2025 – 07/2026

- Develop React Native mobile functionality for Solana-based Web3 applications, including blockchain integrations and user-facing portfolio workflows.
- Build and improve secure mobile features that support decentralized application use cases, wallet-oriented interactions, and tokenized asset experiences.
- Collaborate with engineering and product teams on release readiness, deployment support, debugging, scalable implementation patterns, and CI/CD workflows.

Software Engineer — [SayOne Technologies](#)

08/2023 – 06/2025

- Built and maintained React Native mobile application features for client products across iOS and Android platforms.
- Integrated REST APIs, GraphQL APIs, third-party SDKs, plugins, and native mobile capabilities to deliver customized product requirements.
- Debugged performance, security, and scalability issues across application flows, state management, and network-dependent features.
- Performed testing, troubleshooting, release preparation, EAS build workflows, and App Store and Play Store deployment support for production mobile applications.
- Supported CI/CD automation using GitHub Actions to improve mobile build, deployment, and publishing workflows.

Software Engineer — [Accubits Technologies Inc](#)

12/2021 – 08/2023

- Developed mobile applications for blockchain and artificial intelligence product teams, improving usability across iOS and Android experiences.
- Implemented blockchain-enabled features for real-world mobile applications, including secure digital asset and crypto wallet workflows.
- Worked across React Native application screens, API integrations, debugging, and platform-specific mobile behavior.

Associate Software Engineer — [Sanesquare Private Limited](#)

06/2019 – 12/2021

- Developed web and mobile application features across Angular, Ionic, and React Native projects.
- Implemented UI components, hybrid mobile screens, API-connected workflows, and cross-platform mobile functionality.

- Transitioned into React Native development while improving mobile UI quality, debugging issues, and supporting app performance.

PROJECTS

Lume: Mobile DeFi application for trading tokenized assets and managing on-chain portfolios.

SOLMAIL: Solana-based mobile application for wallet-native messaging, email, and token transfers using decentralized on-chain communication.

My Health Rocks: A mobile application to track and share health progress.

Advantage Lifts: An e-commerce mobile application for car lifts.

Townhall: A mobile app designed for business analysis and marketing.

VOW: Cryptocurrency wallet mobile application enabling secure digital asset management, balance tracking, and crypto transactions.

DREX: Mobile cryptocurrency wallet application designed for secure storage and transfer of digital assets.

KORA: Sustainability-focused mobile application that helps users track, monitor, and reduce carbon emissions through data insights.

HI AND BUY: Mobile marketplace application that allows users to buy and sell products, manage listings, and perform transactions through a digital platform.

Amana: A mobile application that allows users to book, sell, and rent parking and storage spaces, providing a seamless platform for managing space availability and reservations.

MEDVIBES: A web and mobile application that allows users to book appointments with doctors, hospitals, laboratories, and other healthcare service providers.

INNATHECINEMA: A web application for booking movie tickets in film theatres, allowing users to view showtimes, select seats, and reserve tickets online.

EDUCATION

Bachelor's in Electronics and Communication Engineering — Government Engineering College Wayanad, Kerala | 2014 – 2018

LANGUAGES

English, Malayalam
