SUMMARY

Front-End Mobile Application Developer with 7+ years of experience in designing and developing scalable mobile applications. Expertise in React Native, modern JavaScript, TypeScript frameworks, and complex mobile application development. Proficient in implementing state management architectures, applying design patterns, and ensuring high performance through testing and optimization. Experienced in building offline-capable features and delivering reliable, user-friendly applications in production environments.

EXPERIENCE

Senior Software Engineer

Enceladus DLT

06/2025 - Present

Enceladus DLT is a blockchain technology company focused on building decentralized applications (dApps) on the Solana blockchain, delivering scalable, secure, and high-performance Web3 solutions.

- Contributed in developing and improving mobile functionality and blockchain integrations within the application.
- Collaborated with the development team to deliver secure and scalable Web3 solutions.
- Collaborated with cross-functional teams to ensure smooth release, deployment support.

Software Engineer

SayOne Technologies

08/2023 - 06/2025

SayOne Technologies specializes in developing innovative software solutions for clients

- Integrate APIs, third-party libraries, and plugins to enhance app capabilities and deliver customized solutions
- Debug and resolve technical issues, ensuring optimal performance, security, and scalability of the applications
- Conduct rigorous testing and troubleshooting before deployment to app stores
- Stay updated with the latest React Native updates, tools, and best practices to improve development efficiency

Software Engineer

Accubits Technologies Inc

12/2021 - 08/2023

Accubits Technologies Inc focuses on creating robust blockchain and artificial intelligence solutions

- Worked on numerous mobile applications to streamline services and improve user experience
- Contributed to the development of real-world blockchain applications across both iOS and Android mobile platforms.
- Implemented blockchain features on iOS and Android platforms.

Associate Software Engineer

Sanesquare Private Limited

06/2019 - 12/2021

Sanesquare Private Limited provides technology-driven solutions for various sectors

- Gained hands-on experience in real-world application development across both web and mobile platforms.
- Started development on web applications using Angular, implementing UI components and application features.
- Worked on hybrid mobile application development using Ionic, contributing to mobile UI and functionality.
- Transitioned to React Native mobile application development, building cross-platform mobile features and improving application performance.
- Participated in end-to-end feature development, including implementation, testing, debugging, and deployment support.

EDUCATION

Bachelor's in Electronics and Communication Engineering

Government Engineering College Wayanad

LANGUAGES

English Malayalam

SKILLS

Frontend Development:

JavaScript • TypeScript • Angular • HTML5 • CSS3

Mobile App Development:

React Native • Ionic • Expo

State Management & Networking:

Redux • Axios • REST API Integration • GraphQL API Integration • Zustand • Jotai • React Query

Local Database & Offline Storage:

SQLite • Drizzle ORM • WatermelonDB

Tools, IDEs & Collaboration Platforms:

Android Studio • Xcode • VS Code • Git • Jira • Zoho

PROJECTS

Lume

Mobile DeFi application for trading tokenized assets and managing on-chain portfolios.

SOLMAIL

Solana-based mobile application for wallet-native messaging, email, and token transfers using decentralized on-chain communication.

My Health Rocks

A mobile application to track and share health progress.

Advantage Lifts

An e-commerce mobile application for car lifts.

Townhall

A mobile app designed for business analysis and marketing.

VOW

Cryptocurrency wallet mobile application enabling secure digital asset management, balance tracking, and crypto transactions.

DREX

Mobile cryptocurrency wallet application designed for secure storage and transfer of digital assets.

KORA

Sustainability-focused mobile application that helps users track, monitor, and reduce carbon emissions through data insights.

HI AND BUY

Mobile marketplace application that allows users to buy and sell products, manage listings, and perform transactions through a digital platform.

Amana

A mobile application that allows users to book, sell, and rent parking and storage spaces, providing a seamless platform for managing space availability and reservations.

MEDVIBES

A web and mobile application that allows users to book appointments with doctors, hospitals, laboratories, and other healthcare service providers.

INNATHECINEMA

A web application for booking movie tickets in film theatres, allowing users to view showtimes, select seats, and reserve tickets online.
